Maintain Eligibility if Disruption Occurs

If healthcare's revenue management technology fails due to unforeseen events, the impact disrupts patient access, clinical operations and payments. Organizations must maintain the process of confirming a patient's insurance coverage and understanding the details of their benefits before delivering medical care.

Standby Eligibility is the industry's first fallback option to deliver automated insurance verification, implemented in advance. FinThrive's accelerated onboarding prepares your organization if a switch over is needed.

- Embeds in Epic or Meditech
- Integrates with Oracle (Cerner) and other EHRs
- Ensures cleaner claims, financial counseling and less manual tasks

Ensure eligibility workflow if disruption occurs

Key benefits

Protect operations with a Standby Eligibility partner for business continuity

Accelerate the implementation of the insurance verifier product in days

Enable immediate switch over as a true backup for your staff and patients

Proven results
