

Delight Patients Amid No Surprises Act Compliance

The No Surprises Act was passed to protect patients from surprise medical bills. For providers, achieving compliance has been daunting. More than 70% report achieving compliance has been an extreme burden.

FinThrive turns compliance nightmares into patient satisfaction wins.

FinThrive addresses all compliance requirements for customers, such as:

- Generates a compliant Good Faith Estimate that includes providers' itemized services and expected costs
- Displays co-provider and co-facility information on the self-pay/uninsured Good Faith Estimate
- Gives a Notice of Consent to allow out-of-network professionals providing services at an in-network facility to balance bill for some items/services

What is the No Surprises Act?

The law ensures emergency care will not result in surprise billing, while non-emergency care will require patient consent to balance billing. Self-pay/uninsured patients are also protected and must receive complete and accurate Good Faith Estimates before care.

Key benefits

Increase patient satisfaction

Create a positive reputation and brand

Maximize collections and reduce bad debt

Why FinThrive?

#1

#1 in KLAS for Patient Access
